Pacemaker V3 - Lab-08

Pacemaker V3 - Lab 08

- Standalone version (no service access)

Model

```
public class User
{
    public Long id;
    public String firstname;
    public String lastname;
    public String email;
    public String password;

    public User()
    {}

    public User(String firstname, String lastname, String email, String password)
    {
        this.firstname = firstname;
        this.lastname = lastname;
        this.email = email;
        this.password = password;
    }
}
```

```
public class Activity
{
    public Long id;
    public String type;
    public String location;
    public double distance;

    public Activity()
    {}

    public Activity(String type, String location, double distance)
    {
        this.type      = type;
        this.location  = location;
        this.distance  = distance;
    }
}
```

App

```
public class PacemakerApp extends Application
{
    private Map<String, User>           users      = new HashMap<String, User>();
    private Map<String, List<Activity>> activities = new HashMap<String, List<Activity>>();
    private User                           loggedInUser;

    public void registerUser(User user)
    {
        users.put(user.email, user);
        activities.put(user.email, new ArrayList<Activity>());
    }
