to the Head First Lounge

lounge is, no doubt, the biggest trendsetter in... to sample the eclectic offering of elixirs, teas, stay a bit longer and enjoy the multicultural at combines a harmony of taste, texture, and st in fresh and healthy ingredients.

at the lounge, you'll enjoy a smooth mixture of sic sounds, filling the lounge and adding an o your dining experience. The decor surrounds ing sentiments of sights from eras past. And, unge offers free wireless access to the your laptop.

Our guarantee: at the lounge, we've committed to oviding you, our guest, with an exceptional xperience every time you visit. Whether you're t stopping by to check in on email over an ir, or are here for an out-of-the-ordinary ner, you'll find our knowledgeable service y pay attention to every detail. If you're not y satisfied, have a Blueberry Bliss Elixir on us.

night, join us in the backroom as our hoice selection of trance and drum&bass cious tiki-themed dance floor. Or just hang yfy white vinyl booths at the dance bar. You delivered from the main lounge right to the had enough of the boat, just head back to lax. And, no matter where you find yourself

Weekly Elixir Specials

Lemon Breeze
The ultimate healthy drink, this elixir combines herbal botanicals, minerals, and vitamins with a twist of lemon into a smooth citrus wonder that will keep your immune system going all day and all night.

Chai Chiller
Not your traditional chai, this elixir mixes maté with chai spices and adds an extra chocolate kick for a caffeinated taste sensation on ice.

Documenting my trip around the US on my very own Segway!
August 20, 2012

Well I made it 1200 miles already, and I passed through some interesting places on the way:

City	Date	Temperature	Altitude	Population	Diner Rating
Walla Walla, WA	June 15th	75	1,204 ft	29,686	4/5
Magic City, ID	June 25th	74	5,312 ft	50	3/5
Bountiful, UT	July 10th	91	4,226 ft	41,173	4/5
Last Chance, CO	July 23rd	102	4,780 ft	265	3/5
Truth or Consequences, NM	August 9th	93	4,242 ft	7,289	5/5
Why, AZ	August 18th	104	860 ft	480	3/5

The cities I visited on my Segway'n USA travels

July 14, 2012
I saw some Burma St...

Welcome to the Head First Lounge

The Head First Lounge is, no doubt, the biggest trend setter in the industry. We offer a variety of elixirs, teas, and coffees, or, stay a bit longer and enjoy the multicultural atmosphere that combines a harmony of taste, texture, and color with the best in fresh and healthy ingredients.

During your stay at the lounge, you'll enjoy a smooth mixture of sic sounds, filling the lounge and adding an extra dimension to your dining experience. The decor surrounds you with sentiments of sights from eras past. And, don't forget, the lounge offers free wireless access to the internet on your laptop.

Starbuzz meets social media

3/10/2012

Here at Starbuzz we're embracing the social media craze. In fact, we're going further than any of our competitors and we're very close to announcing a revolutionary new product that links your coffee drinking directly to your social network. Forget "checking in," we're going way beyond that, and with this new product every sip of smooth, aromatic, hot Starbuzz blend is going to be shared with your social network.

Sound like science fiction? It's not. I'm already testing our final prototype social network cup as I write this, which links you, the drinker, right to your favorite social networks. We've made a huge investment to make this happen and we've created a reusable coffee cup complete with RFID, NFC, Bluetooth, and WiFi (not to mention a few more things the tech folks know about, because hey, I'm just the coffee guy).

So, keep your eyes out for this amazing new cup. And I'll be releasing a video teaser soon to tell you all about this new invention, straight from Starbuzz Coffee.

Starbuzz uses computer science

3/10/2012

Have you ever noticed how efficient a Starbuzz Coffee house is? The lines always move fast, and despite the astronomical number of different drinks any customer can order, we have your drink up, hot (or cold if that's the way you want it) and ready in seconds. How do we do it?

To pull this off, we take advantage of the latest and greatest in computer science. In fact, we train our staff to be one big distributed computer. The customers create the orders for the distributed computer, complete with your name and the drink's special instructions. Then our specialized drink makers grab the next cup and go about working on your order until it's finished.

With this design, we are able to horizontally scale our operation any time we want. All we need to do is add more customers and drink makers (not to mention a fair amount of support staff you never see) as the customer flow grows.

Most unique patron of the month

2/18/2012

Our most unique patron of the month award goes to a customer in Poulsbo, Washington, whose daily morning order is a "six-splenda, no-foam, 130-degree non-fat-ony latte, with the splenda stirred in before the milk is added." Do we have unique customers or what?

Starbuzz Coffee

...providing all the caffeine you need to power your life. just drink it.

CITY COFFEE, QUALITY CAFFEINE

Starbuzz Coffee, we are dedicated to filling all your caffeine through our quality coffees and teas. Sure, we want you to great cup of coffee and a great coffee experience as well, we're the only company that actively monitors and optimizes caffeine levels. So stop by and fill your cup, or order online with our Bean Machine online order form, and get that quality Starbuzz coffee that you know will meet your caffeine standards.

OUR STORY

"A man, a plan, a coffee bean". Okay, that doesn't make a palindrome, but it resulted in a damn good cup of coffee. Starbuzz's CEO is that man, and you already know his plan: a Starbuzz on every corner.

In only a few years he's executed that plan and today you can enjoy Starbuzz just about anywhere. And, of course, the big news this year is that Starbuzz teamed up with Head First readers to create Starbuzz's Web presence, which is growing rapidly and helping to meet the caffeine needs of a whole new set of customers.

STARBUZZ COFFEE BEVERAGES

We've got a variety of caffeinated beverages to choose from at Starbuzz, including our House Blend, Mocha Cafe Latte, Cappuccino, and a favorite of our customers, Chai Tea.

We also offer a variety of coffee beans, whole or ground, for you to take home with you. Order your coffee today using our online Bean Machine, and take the Starbuzz Coffee experience home.

ORDER ONLINE with the BEAN MACHINE

FAST FRESH TO YOUR DOOR

Why wait? You can order all our fine coffees right from the internet with our new, automated Bean Machine. How does it work? Just click on the Bean Machine link, enter your order, and behind the scenes, your coffee is roasted, ground (if you want), packaged, and shipped to your door.

June 2, 2012

My first day of the trip! I can't believe I finally got everything packed and ready to go. Because I'm on a Segway, I wasn't able to bring a whole lot with me:

- cellphone
- iPod
- digital camera
- and a protein bar

Just the essentials. As Lao Tzu would have said, "A journey of a thousand miles begins with one Segway."

Markup, Style, Function

- Markup (XHTML, HTML)
 - Structure
 - Content
- Style (CSS)
 - Style
 - Presentation
 - Appearance
- Function (Javascript)
 - Actions
 - Manipulations

Content, Presentation, Behavior

- **Content** comprises the information the author wishes to convey to his or her audience, and is embedded within HTML or XHTML markup that defines its structure and semantics.
- Most of the content on the Web today is text, but content can also be provided through images, animations, sound, video, and whatever else an author wants to publish

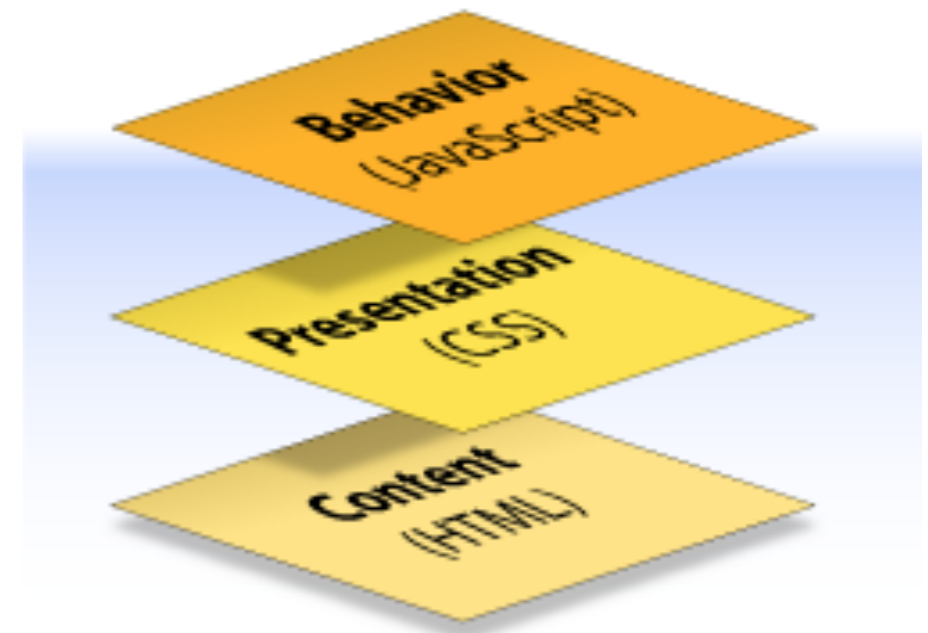

Content, Presentation, Behavior

- **Presentation** defines how the content will appear to a human being who accesses the document in one way or another
- The conventional way to view a web page is with a regular web browser, of course, but that's only one of many possible access methods. For example, content can also be converted to synthetic speech for users who have impaired vision or reading difficulties

Content, Presentation, Behaviour

- **Behaviour** layer involves real-time user interaction with the document.
- This task is normally handled by JavaScript.
- The interaction can be anything from a trivial validation that ensures a required field is filled in before an order form can be submitted, to sophisticated web applications that work much like ordinary desktop programs.

Separation of Concerns

- It's possible to embed all three layers within the same document
 - `` and `` can be used to control the presentation of text, and `<hr>` will insert a visible rule element
- Sometimes called *Presentation Markup*, these types of elements embed presentation-layer information within the content layer, they negate any advantage we may have gained by keeping the layers separate.

Keeping them separate gives us one valuable advantage:

We can modify or replace any of the layers without having to change the others.

What is CSS?

CSS is a language for specifying how documents are presented to users — how they are styled & laid out

Cascading Style Sheets is the recommended way to control the presentation layer in a web document.

The main advantage of CSS over presentational HTML markup is that the styling can be kept entirely separate from the content.

CSS also provides far better control over presentation than do presentational element types in HTML.

Example

index.html

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <title>My CSS experiment</title>
    <link rel="stylesheet" href="style.css">
  </head>
  <body>
    <h1>Hello World!</h1>
    <p>This is my first CSS example</p>
  </body>
</html>
```

style.css

```
h1 {
  color: blue;
  background-color: yellow;
  border: 1px solid black;
}

p {
  color: red;
}
```

```
h1 {  
  color: blue;  
  background-color: yellow;  
  border: 1px solid black;  
}  
  
p {  
  color: red;  
}
```

Two rules

```
h1 {  
  color: blue;  
  background-color: yellow;  
  border: 1px solid black;  
}
```

The first rule starts with an h1 selector, which means that it will apply its property values to the <h1> element. It contains three properties and their values:

1. The first one sets the text color to blue.
2. The second sets the background color to yellow.
3. The third one puts a border around the header that is 1 pixel wide, solid (not dotted, or dashed, etc.), and colored black.

```
p {  
  color: red;  
}
```

The second rule starts with a p selector, which means that it will apply its property values to the <p> element. It contains one declaration, which sets the text color to red.

```
h1 {
  color: blue;
  background-color: yellow;
  border: 1px solid black;
}

p {
  color: red;
}
```

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <title>My CSS experiment</title>
    <link rel="stylesheet" href="style.css">
  </head>
  <body>
    <h1>Hello World!</h1>
    <p>This is my first CSS example</p>
  </body>
</html>
```

Rules Applied to HTML document

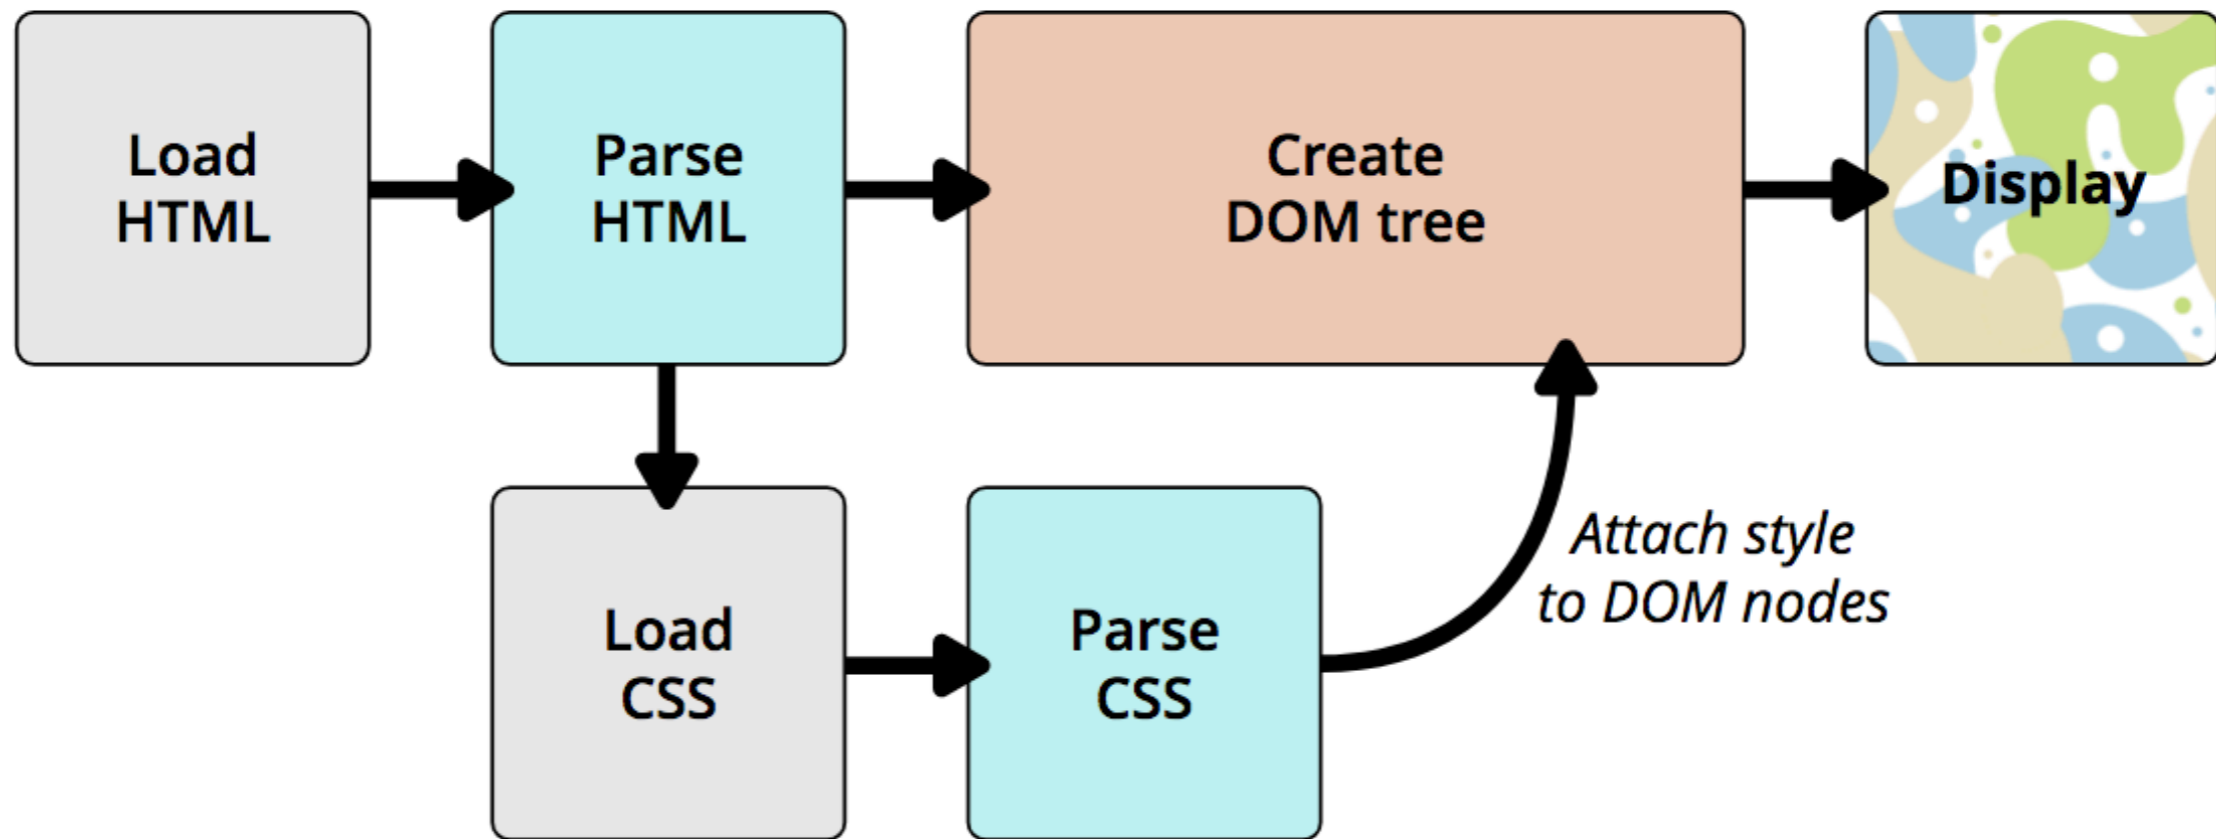

Hello World!

This is my first CSS example

Browser Render

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <title>My CSS experiment</title>
    <link rel="stylesheet" href="style.css">
  </head>
  <body>
    <h1>Hello World!</h1>
    <p>This is my first CSS example</p>
  </body>
</html>
```

How CSS Does it Work?

1. The browser converts HTML and CSS into the DOM (Document Object Model). The DOM represents the document in the computer's memory. It combines the document's content with its style.
2. The browser displays the contents of the DOM.

<link> element

Use the link element to "link in" external information.

The type of this information is "text/css". In other words, a CSS style sheet.

And the style sheet is located at this href (in this case we're using a relative link, but it could be a full-blown URL).

`<link type="text/css" rel="stylesheet" href="lounge.css" />`

The rel attribute specifies the relationship between the XHTML file and the thing you're linking to. We're linking to a style sheet, so we use the value "stylesheet".

<link> is an empty element.

One Stylesheet - Multiple html pages

Index.html

```
<head>
  <title>App Store</title>
  <link type="text/css" rel="stylesheet" href="style.css" />
</head>
```

movies.html

```
<head>
  <title>Movies</title>
  <link type="text/css" rel="stylesheet" href="style.css" />
</head>
```

music.html

```
<head>
  <title>Music</title>
  <link type="text/css" rel="stylesheet" href="style.css" />
</head>
```

Style.css

Rules

Selectors

Declarations

Properties

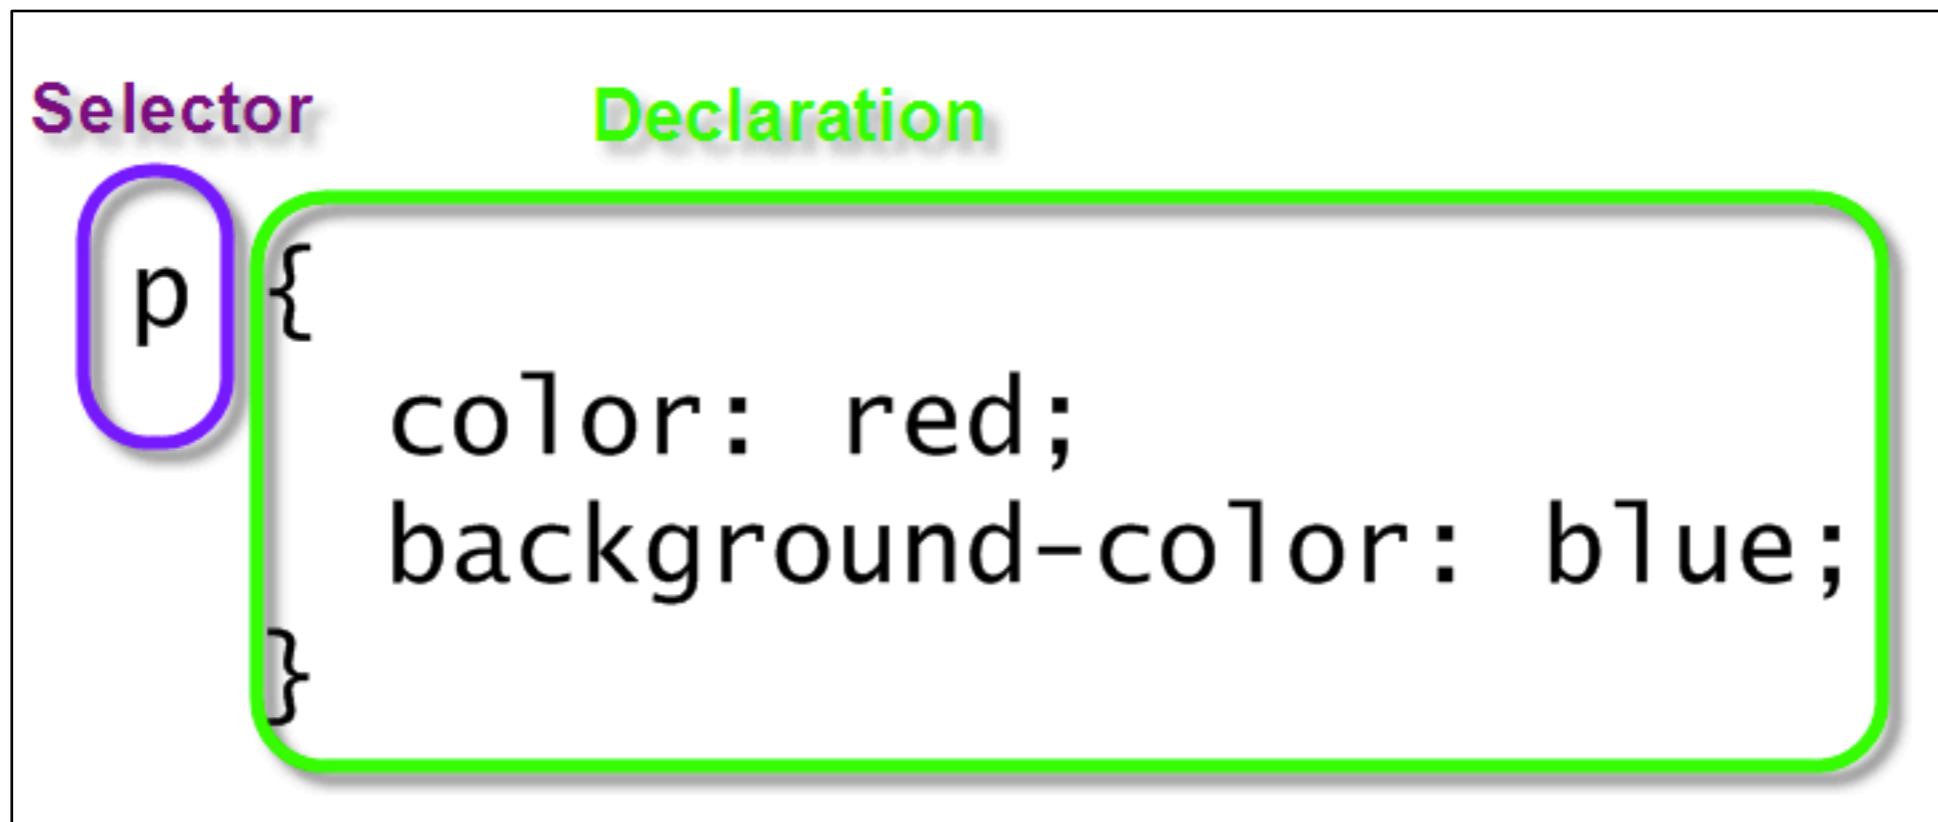

Values

CSS Rule

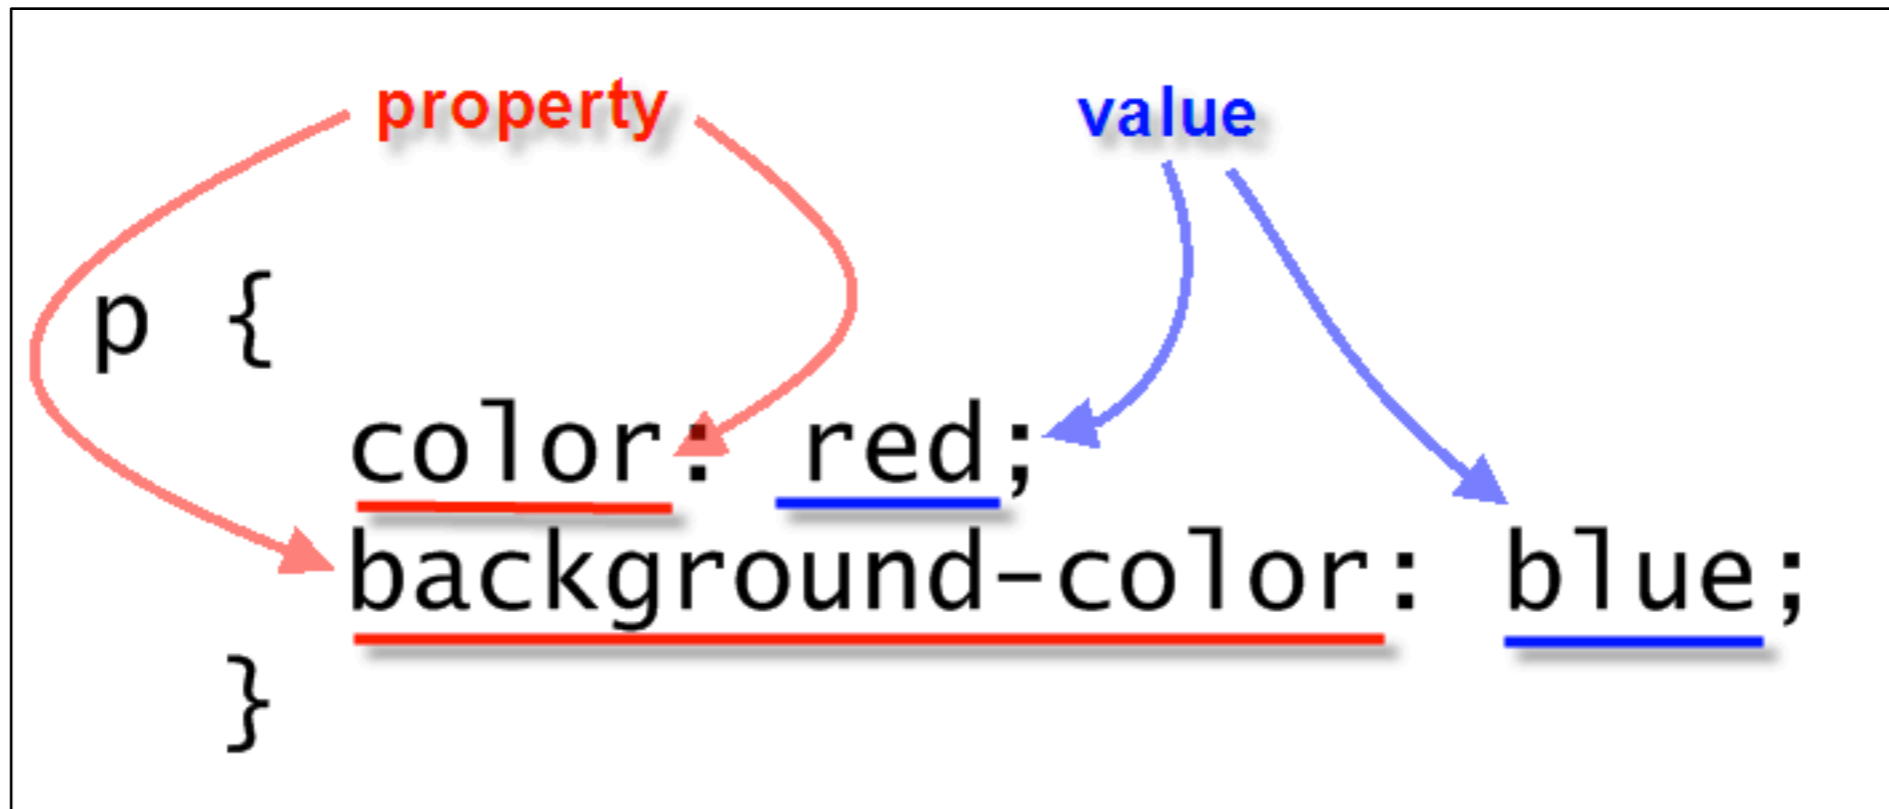

```
p {  
    color: red;  
    background-color: blue;  
}
```

CSS
Rule

Selector and Declarations

Properties & Values

A CSS Rule

The first thing you do is select the element you want to style, in this case the <p> element. Notice in CSS, you don't put <> around the name.

Then you specify the property you want to style, in this case the <p> element's background color.

```
p {  
  background-color: red;  
}
```

And you're going to set the background-color to red.

At the end, put a semicolon.

Place all the styles for the <p> element in between { } braces.

There's a colon in between the property and its value.

We call the whole thing a RULE.

More Properties...

- You can add as many properties and values as you like in each CSS rule.
- To put a border around your paragraphs:

```
p {  
    background-color: red;  
    border: 1px solid gray;  
}
```

All you have to do is add another property and value.

The <p> element will have a border...

...that is 1 pixel thick, solid, and gray.
